Access Control Network

We offers sophisticated systems consisting of an electrically operated Hoisting machine incorporating a 'a' cable guidance system and Anti Inclination safety locks as well as Speed Limit safety locks. These are available up to 800kg capacity. These Cradle systems are easy to install on the roof of the building. The height of the suspension Jib, as well as the projecting length (front beam) is adjustable so the system can easily adapt to different Facades and Fascia's as well as roof structures. Special systems can be designed to suit the user's nonstandard requirements.

Foam System

Our organization is well known in the industry for catering a distinguished segment of Foam Based Fire System. These products are made from high quality components.

Features:-

- Rugged structure
- Rust proof
- Long Working Life

Flooding System

We are engaged in offering Flooding Systems. This type of fire extinguishing system consists of high-pressure cylinders or low-pressure tanks containing carbon dioxide (CO₂) agent under pressure, connected to fixed piping nozzles. The systems are used for total flooding of a volume or for local application.

Fire Protection Equipments

CCTV

Valued as first among the best, we are engaged in offering the best quality of CCTV Monitoring Services. It is used for video surveillance of various establishments such as banks, jewelry shops and airports. Known for their timely execution and cost effectiveness, these services are rendered by a panel of experts who hold expertise in their area of work. Our squad of adroit professionals assists us to manufacture, trade, and supply CCTV Camera Monitoring. Used for security purpose, these CCTV cameras are made with supreme quality basic material with the help of latest -manufacturing process under the direction of our capable professionals. To meet diverse needs of customers, we provide these CCTV cameras in several specifications. Along with that, our offered CCTV cameras are quality tested on various parameters for delivering flawless range.

We are one of the prominent firms in offering a wide range of VESDA Systems in the market. Our offered collections of these products are manufactured using the new technology and high grade raw-material at our vendor end. Furthermore, to maintain the quality, these products are checked against numerous quality norms and industry set parameters. In addition, we offer these products to our client at reasonable price.

When high value assets, equipment or irreplaceable items are at stake, early warning of a smoke or fire problem, is essential. Compatible and complimentary to each of fire alarm and fire suppression systems, VESDA early warning smoke detection monitors the entire progression of a fire - easily detecting fire long before smoke is visible and long before any other forms of detection. With the world's widest sensitivity range, VESDA air monitoring produces multi-level warnings at the very early stage of an impending fire.

This provides the valuable time necessary to initiate a flexible, appropriate response.
